SUMMARY

MSc IT student and Full-Stack Developer skilled in Python/Flask, JavaScript/TypeScript, React and Next.js, SQL databases, and REST API development. Experienced in shipping deployed applications end-to-end - from a Flask/MySQL fitness marketplace to a real-time FastAPI + Next.js delivery-tracking platform - using Vercel, Render, and Netlify. Combines this with professional experience as a Prompt Engineer producing commercial AI image and video content, bringing a full-stack development identity with a strong AI/Generative AI specialization.

TECHNICAL SKILLS

Languages	Python, JavaScript, TypeScript, PHP, Java, C#, SQL
Frontend	React.js, Next.js, HTML5, CSS3, Tailwind CSS, Bootstrap, jQuery
Backend	Flask, FastAPI, Node.js / Express, PHP, REST APIs, WebSockets
Databases	MySQL, PostgreSQL, MongoDB, SQLite
AI / Generative AI	Prompt Engineering, Google Gemini API integration, AI image generation, AI video generation (Kling AI, Flow AI, ElevenLabs)
Tools & Deployment	Git, GitHub, GitHub Actions, VS Code, Vercel, Render, Netlify

EXPERIENCE

Prompt Engineer - Image & Video Generation

FYD Studio | Ahmedabad | March 2025 - Present

- Design and refine prompts for AI-driven image and video generation models used in commercial content production.
- Produce AI advertisements and promotional campaigns using tools including Kling AI, Flow AI, and ElevenLabs, handling storyboarding and character consistency.
- Iterate on prompt strategies and evaluate model outputs to improve visual accuracy, consistency, and aesthetic quality.
- Collaborate with a creative team to deliver commercial-grade AI visual content on client timelines.

Full-Stack Developer Intern

Upeya Electronics | Gujarat | January 2025 - May 2025

- Built and maintained full-stack web applications using HTML, CSS, JavaScript, PHP, and SQL.
- Developed responsive front-end interfaces and integrated them with back-end REST APIs.
- Participated in agile sprints, peer code reviews, and client requirement discussions across a 5-month internship.

SELECTED PROJECTS

GoalFit AI Pro - AI Fitness & Coaching Marketplace

Major MSc IT Project | In Development

Technologies: Python, Flask, MySQL, HTML5, CSS3, JavaScript, Bootstrap, jQuery, Razorpay, Render

- Building an AI-assisted fitness and nutrition platform with workout recommendations, diet planning, BMI analysis, and progress tracking.
- Implementing a coach/dietitian marketplace with Razorpay payment integration and a dedicated admin panel for user, plan, and subscription management.
- Structured as a modular Flask application (separate modules, database, and documentation layers) and deployed live on Render.

Live Demo: goalfit-ai-pro.onrender.com | GitHub: github.com/harshpdcode/GoalFit-AI-Pro

DSR Go - Autonomous Campus Delivery Robot Platform

Personal Project | Silver Oak University Campus Delivery System

Technologies: Next.js 15, React 19, TypeScript, Tailwind CSS, FastAPI, Python 3.12, SQLAlchemy 2.0 (async), WebSockets, PostgreSQL/SQLite

- Built a full-stack, real-time delivery-tracking platform with live telemetry - animated robot position, heading, speed, and battery across campus block waypoints.

- Implemented OTP-based secure compartment unlocking with a sender/receiver audit trail for delivery verification.
- Developed an admin fleet-management dashboard for robot status control (idle, en route, charging, offline) and delivery simulation, backed by an async FastAPI + WebSocket backend.

Live Demo: dsr-delivery-bot.vercel.app | GitHub: github.com/harshpdcode/DSR-Delivery-Bot

Resolvly - AI-Powered Complaint & Ticket Management System

Personal Project

Technologies: TypeScript, Next.js, Prisma ORM, Tailwind CSS, Google Gemini AI

- Developed a complaint/ticket management system with automated triage powered by the Google Gemini API.
- Implemented role-based access control (RBAC) along with SLA analytics and resolution tracking.

GitHub: github.com/harshpdcode/Resolvly

Autonomous Multi-Mode Robot - Avishkar Event, 1st Place

Silver Oak University

Technologies: Node.js, Express, Socket.io, SQLite, Google Gemini AI, ESP32-S3, APM 2.8

- Designed and built a multi-mode autonomous robot supporting Farmer Mode (agricultural navigation), Delivery Mode (autonomous campus delivery), and Campus Guide Mode (interactive student guidance).
- Combined sensor-based navigation, GPS waypoint routing, and Gemini-based voice interaction with a live telemetry dashboard.
- Won 1st Place at the Avishkar event, Silver Oak University.

GitHub: github.com/harshpdcode/DynoRex-X1

Taskify Pro - Productivity & Task Management Web App

Personal Project

Technologies: Deployed web application (public repository not indexed at time of writing)

- Built and deployed a task/productivity web application focused on planning workflows.

Live Demo: taskify-pro-sooty.vercel.app

Additional Projects

- Birthday Celebration Websites (Client Projects) - Two personalized, animated frontend websites (HTML5, CSS3, JavaScript) featuring cinematic transitions, multimedia integration, and interactive UI, deployed on Netlify.

EDUCATION

Master of Science - Information Technology (MSc IT)

Silver Oak University | Ahmedabad | August 2025 - Present | Semester 3

Bachelor of Computer Application (BCA)

Ganpat University | Gujarat | 2021 - 2024

ACHIEVEMENTS

- 1st Place - Avishkar Event, Silver Oak University (Autonomous Multi-Mode Robot).
- 2nd Place - Technical Presentation (English), Ganpat University.
- 2nd Place - Non-Technical Presentation (Hindi), Ganpat University.

CERTIFICATIONS

Android Application Development (Great Learning) | Python Fundamentals (360DigiTMG) | Foundational C# (Microsoft)

Java Programming (Great Learning) | PHP Development (Great Learning) | Digital Productivity (NIIT Foundation)
